The owner, the University of Connecticut ("Assignee"), of 100% interest in the instant application by virtue of an assignment, hereby disclaims, except as provided below, the terminal part of the statutory term of any patent granted on the instant application, which would extend beyond the expiration date of the full statutory term defined in 35 U.S.C. §§ 154 to 156 and 173, as presently shortened by any terminal disclaimer, of prior United States Patent No. 6,525,242, which issued on February 25, 2003. Assignee hereby agrees that any patent so granted on the above-identified application shall be enforceable only for and during such period

that the legal title to said patent shall be the same as the legal title to U.S. Patent No. 6,525,242. The Assignee further agrees that this agreement is to run with any patent granted on the above identified application and is to be binding upon the grantee, its successors, and assigns.

The Assignee does not disclaim any terminal part of any patent granted on the above-identified application prior to the expiration date of the full statutory term of U.S. Patent No. 6,525,242 in the event that said patent later: expires for failure to pay a maintenance fee, is held unenforceable, is found invalid, is statutorily disclaimed in whole or terminally disclaimed under C.F.R. 1.321(a), has all claims canceled by a reexamination certificate, or is otherwise terminated prior to the expiration of its full statutory term, except for the separation of legal title stated above.

The undersigned is an attorney of record.
